---

The main raw materials are calcined high-quality bauxite and fused silicon carbide, Adding inert materials, therefore, the product has good alkali resistance, does not react with cement lining in the process of high temperature use, and has excellent anti crust performance. The product has high strength, good wear resistance and corrosion resistance, and good thermal shock resistance. It is widely used in cement kiln, lime kiln and other industrial furnaces

3,Main characteristics:

- 1) It has good corrosion resistance and does not react with Cao
- 2) Strong wear resistance and erosion resistance
- 3) The coating resistance and thermal shock resistance are excellent
- 4) The application effect is excellent in cement rotary kiln and lime kiln

4,Application: it is mainly used in the parts of cement kiln and lime kiln for abrasion resistance and skin resistance. It has good application effect at home and abroad, and can supply 30000-50000 tons of products every year. Export to South Africa, Russia, Middle East, Southeast Asia, etc

5,Packing: high strength, waterproof and moisture-proof kraft paper bags are used for easy sea transportation and safe and reliable
